## Got Water?

---

With the amount of rain received in recent months, it is easy to take water for granted. However rising population, climate change and pollution have negatively impacted the world's freshwater supplies. The United Nations predicts that approximately half of the world's population will face severe [water stress](#) by 2030.

---

### Infrastructure Act of 2018

The American Society of Civil Engineers' reported that water-main breaks across the US resulted in the loss of two trillion gallons of water in 2017.

On October 23, 2018, congress passed the [Infrastructure Act](#) which provides for water infrastructure improvements throughout the country.

---

### Water Treatment

Your [ProAsys](#) water treatment program will help to identify areas of water loss, reduce water consumption and provide energy savings.

If (or when) water losses occur, please be sure to make every effort to correct them as soon as possible.

### How to Detect a Leak

Installation of a water [meter](#) will provide valuable information regarding water consumption at a minimal cost.

Water tracing [dyes](#) are available in a variety of colors and forms (i.e. solids, liquids).

---

## The Big Thirst

In the US, currently one out of every six gallons of treated water is leaked/lost before it can be used.

[The Big Thirst](#), a book by Charles Fishman, examines the future of a natural resource that we can no longer take for granted and will forever change the way we think about water.

### AWT - PWW Partnership

Association of Water Technologies (AWT) partners with [Pure Water](#) for the World (PWW) to bring safe water solutions to Honduras and Haiti.
